X-431 ADAS Calibration Equipment

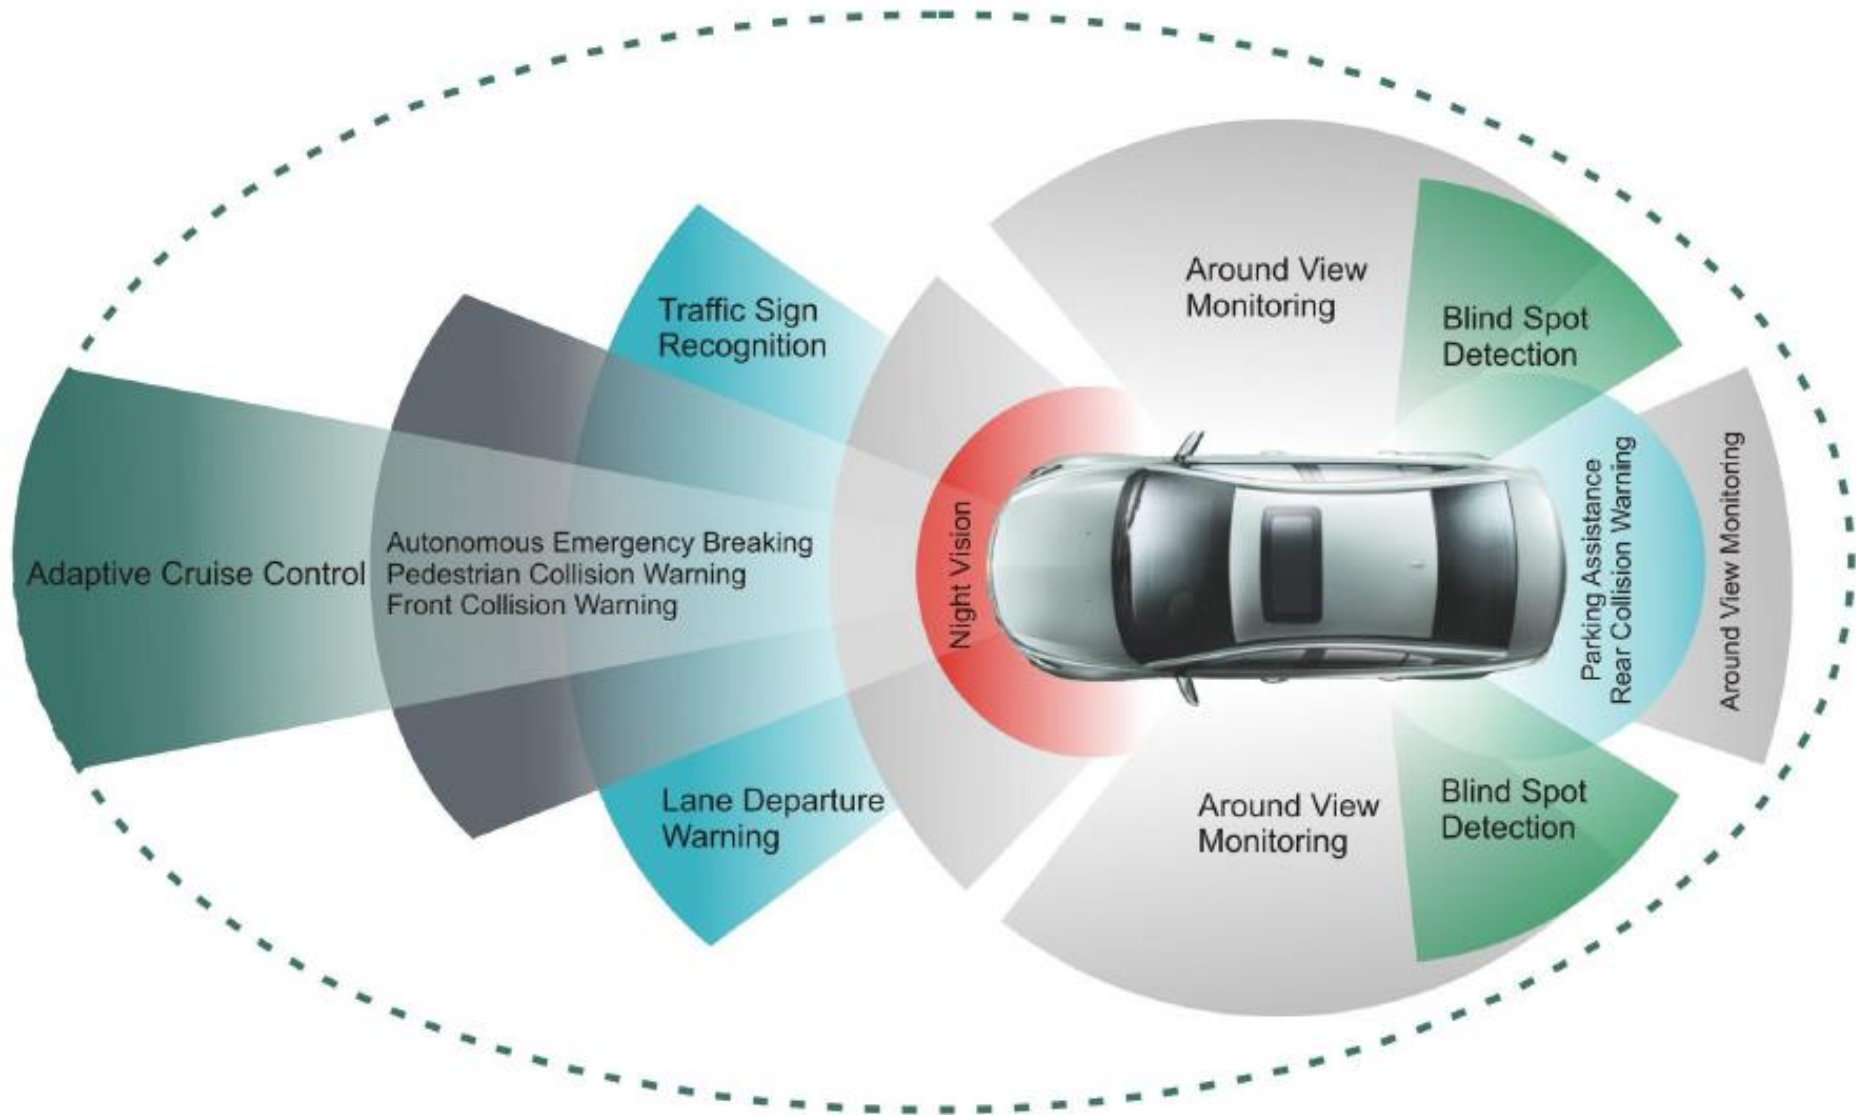

LAUNCH Europe GmbH

Introduction

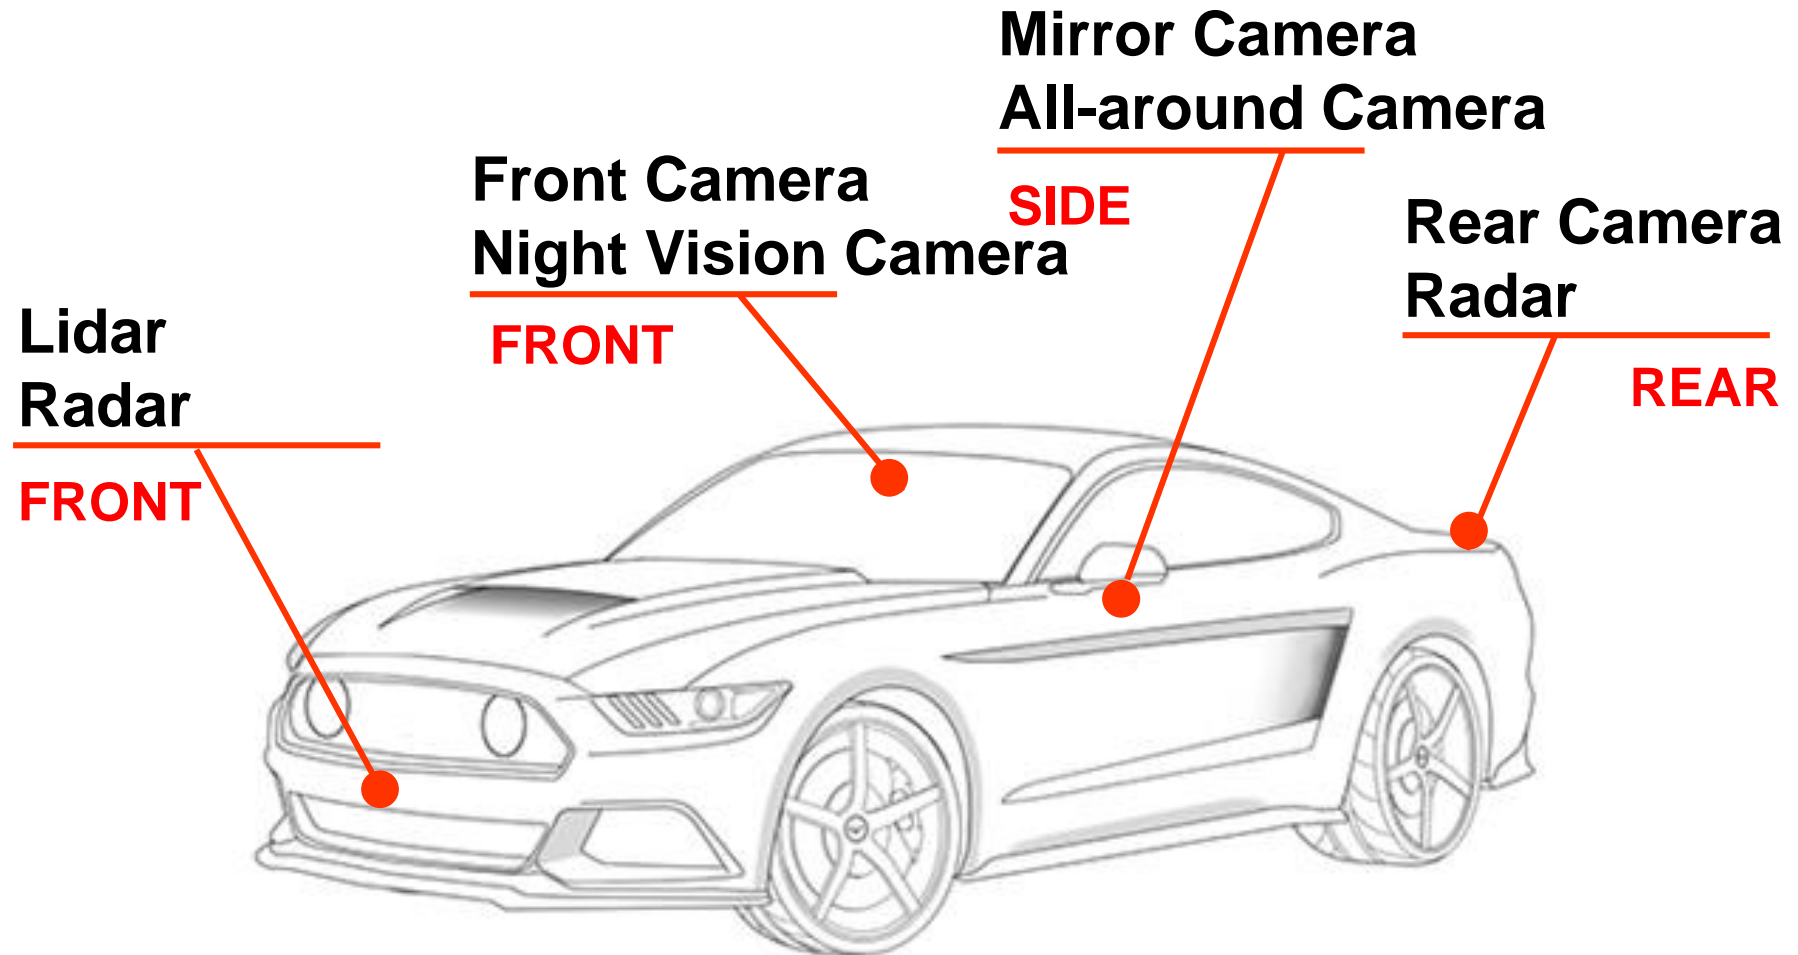

X-431 ADAS is the latest automotive ADAS camera and radar calibration equipment developed by Launch. With the LAUNCH professional diagnosis tools, you can simply do the job of calibration of camera- and radar-based ADAS systems. The X-431 ADAS allows the operator to locate the camera calibration panels and the radar reflector panel in the correct position to ensure the system calibration to be carried out quickly and accurately.

X-431 ADAS is suitable to the auto body shop, glass service shop, and professional workshop, to provide the professional recalibration for the ADAS camera and radar, when the sensors have been removed, replaced or repaired.
